

## Inauguration Ceremony for Nissin Academy Training Center and Nissin Club Saganoso

Nissin Electric Co., Ltd. had been advancing, for the occasion of the 100th anniversary of its establishment, the construction of its new training center, Nissin Academy Training Center, in the east-side plot by its Head Office site, with the work being completed in February 2019.

The total area for training rooms and practical training rooms in the new training facility is approximately twice that in the past, and they have been built to provide a venue for a wide range of actual equipment-based training for passing on our technologies, from those contained in power system equipment to charged beam and processing equipment. Completed along with this recreational facility is Nissin Club Saganoso, to serve as a venue for facilitating communication among employees. In designing the outside appearance, the surrounding landscape was taken into consideration to exemplify our concern for the environment, and planted areas have been established in exterior areas.

The main features of the buildings are as follows:

- Outside appearance design fusing the tradition of Kyoto and innovative functions with the surrounding landscape taken into consideration
- Following the “The Basic Plan for Green of Kyoto City”, many exterior spaces and green areas have been installed, under the concept of biodiversity and rain garden, paying consideration to the environment.
- LED lights are used throughout the buildings as an energy saving measure, and lights in corridors, resting spaces and the like are controlled with motion sensors.
- Air conditioning loads are reduced through the adoption of high insulation performance roofs and double glazed windows to shut out sun rays and cold air along with the use of high efficiency air conditioners. Natural air circulation is realized by measures such as courtyards, which provide paths for air.

Outside appearance

Rain garden

Courtyard

## **Spatial Organization**

Consisting of the two-story training building and the single-story practical training building  
Part of the first floor of the training building is used as Nissin Club Saganoso for facilitating communication among employees.

## **Training Building**

- 1 F Great training hall (160 + 160 m<sup>2</sup>) max. 300 person capacity
  - Reception room (30 m<sup>2</sup>)
  - Center office (80 m<sup>2</sup>)
  - Dining hall (80 m<sup>2</sup>)
  - Nissin Club Saganoso
- 2 F Six medium-sized (80 m<sup>2</sup>) training rooms, each with a capacity of 20 to 30 persons. Two rooms can be converted into 1 room (60 to 80-person capacity)

## **Practical Training Building**

Furnished with 14 large and small rooms ready for a wide variety of training using equipment ranging from power system equipment to charged beam and processing equipment

## **Nissin Club Saganoso**

Facility where spaces are provided for facilitating communication between employees and with the company's stakeholders, as well as spaces for enriching communication between peers, between superiors and subordinates, and with outside people  
Saganoso consists of 5 rooms, including a grand hall with a capacity of 48 persons and small rooms that can hold up to 8 persons. The facility's guests can enjoy conversation while dining.

## **Summary of Nissin Academy Training Center and Nissin Club Saganoso**

Address: 8-8 Umezu-Minamihiro-cho, Ukyo-ku, Kyoto City (located on the eastern side of the Head Office and Works)

Land area: Approx. 5,000 m<sup>2</sup>

Total floor area: 3,341 m<sup>2</sup> (1F: 2,529 m<sup>2</sup>, 2F: 812 m<sup>2</sup>)

Building area: 2,632 m<sup>2</sup>

Completion date: February 4, 2019

Usage: Training facility for the purpose of training and developing human resources

Recreation facility for the purpose of facilitating communication among employees

Capital investment: Approx. 1.2 billion yen
